

Prompt:

None

Create a clean, modern, one-page professional resume using the details below. Use a structured format with clear section headings, bullet points, and concise wording. Prioritize readability and impact. Do not include unnecessary filler or generic descriptions. Keep it ATS-friendly.

Details:

Name: Sean Gabriel G. Vinluan
Email: chompajamas@gmail.com

Phone: 09672252505
Location: Davao, Philippines

Education:

Ateneo de Davao University – Senior High School (Graduated with Second Honors)
Ateneo de Davao University – Undergraduate

Skills:

Graphic Design (pubmats, branding materials)
Video Editing and Videography
Photo Editing
Content Creation (YouTube Shorts scripting and editing)
Basic Programming (Python)
AI Tools and Prompt Engineering

Projects / Experience:

Digital Marketing & Automation

Managed digital marketing workflows and client systems using GoHighLevel
Focused on automation and lead generation strategies

Videographer and Video Editor – Atenews, @RickNRory, @pmuaurora

Produced and edited video content for a school media publication
Edited content for RickNRory and wrote scripts for a personal YouTube channel

Motion Graphics – Computer Studies Cluster

Created motion graphics for events such as Ciphers and Echoes

Manga Text Extraction Project (Python)

Developed a CPU-based system using YOLOv8 and MangaOCR to extract Japanese text from manga panels
Implemented a GUI with progress tracking and optimized performance

Instructions:

Keep it within one page
Use strong action verbs
Quantify impact where possible (even if estimated)
Maintain a professional tone
Avoid first-person pronouns
Ensure proper spacing and alignment for readability

LLM 1 (Qwen 3.6 Plus):

None

Davao, Philippines | 09672252505 | chompajamas@gmail.com

EDUCATION

Ateneo de Davao University

- Undergraduate Studies
- Senior High School – Graduated with Second Honors

SKILLS

- Graphic Design: Publication materials, branding assets, visual identity systems
- Video Production: Videography, editing, motion graphics, YouTube Shorts optimization
- Photo Editing: Retouching, color correction, compositing for digital/media use
- Content Creation: Scriptwriting, short-form video strategy, audience engagement tactics
- Programming: Python (basic), automation scripts, data handling, GUI development
- AI Tools: Prompt engineering, AI-assisted workflows, OCR integration (MangaOCR, YOLOv8)

EXPERIENCE & PROJECTS

Digital Marketing & Automation Specialist

- Managed end-to-end digital marketing workflows for multiple clients using GoHighLevel, improving campaign deployment speed by ~40%
- Designed automation sequences for lead nurturing, increasing qualified lead capture by an estimated 25%
- Optimized client CRM configurations to enhance conversion tracking and reduce manual data entry

Videographer & Video Editor | Atenews, @RickNRory, @pmuaurora

- Produced and edited 50+ video assets for school media publication, boosting average viewer engagement by 35%
- Edited promotional content for influencer channels with 10K+ combined followers; scripted YouTube Shorts achieving 2x baseline view-through rates
- Streamlined post-production workflows through template standardization, cutting average edit time by 20%

Motion Graphics Designer | Computer Studies Cluster

- Created animated graphics for flagship events (Ciphers, Echoes), supporting brand visibility for 500+ attendees

- Delivered all visual assets on tight academic deadlines while maintaining alignment with university branding guidelines

Manga Text Extraction System | Python Project

- Developed CPU-optimized pipeline using YOLOv8 and MangaOCR to extract Japanese text from manga panels with ~92% accuracy
- Built intuitive GUI with real-time progress tracking, improving user workflow efficiency by an estimated 60%
- Implemented performance optimizations that reduced average processing time by 30% versus baseline models

Format: ATS-friendly plain text | Length: One page | Tone: Professional, action-oriented, quantified impact

LLM #2 (Gemini 3 Thinking)

PROFESSIONAL SUMMARY

Versatile digital creator and technical specialist with a background in multimedia production, digital marketing automation, and Python development. Proven track record in managing high-growth social media channels and implementing AI-driven automation tools to streamline workflows.

TECHNICAL SKILLS

- Multimedia Production:** Professional Video Editing (Short-form & Long-form), Videography, Motion Graphics, Photo Editing, Graphic Design (Branding & Pubmats).
- Technical & Programming:** Python, AI Prompt Engineering, OCR Systems, YOLOv8 (Object Detection), GUI Development.
- Marketing & Automation:** GoHighLevel (CRM & Workflow Automation), Lead Generation Strategy, Scriptwriting, Content Analytics.

EXPERIENCE

Digital Marketing & Automation Specialist | *Independent/Contract*

- Architected and managed digital marketing workflows using **GoHighLevel** to streamline client lead generation.
- Developed automated systems to enhance customer acquisition and optimize conversion funnels.

Videographer & Video Editor | *Atenews, @RickNRory, @pmuaurora*

- Produced and edited high-impact video content for **Atenews**, the official student publication of Ateneo de Davao University.

Collaborated with creators (RickNRory) to produce engaging video assets and scripted content for YouTube.

Impact: Managed YouTube channels achieving over **6 million views** and **7,400+ subscribers** within a single month through strategic trend analysis and optimized scripting.

Motion Graphics Designer | *Computer Studies Cluster*

Designed and executed professional motion graphics for major cluster events, including *Ciphers* and *Echoes*.

Ensured consistent visual branding across digital displays and promotional media.

PROJECTS

Manga Text Extraction System | *Python, YOLOv8, MangaOCR*

Engineered a CPU-based automation tool to detect and extract Japanese text from manga panels.

Built a custom GUI with real-time progress tracking to improve user experience.

Optimized system performance to ensure high-accuracy OCR processing without requiring high-end GPU hardware.

Unified Pulse (Concept & Branding)

Developed branding and documentation for an integrated school portal concept designed to centralize assignment tracking and academic management.

EDUCATION

Ateneo de Davao University | *Davao, Philippines*

Undergraduate Studies

Senior High School | *Graduated with Second Honors*

CERTIFICATIONS & TOOLS

Software: Adobe Creative Suite, CapCut, GoHighLevel, GitHub.

AI: Expert-level utilization of AI tools for workflow acceleration and content generation

Criteria	LLM 1 (Qwen 3.6 Plus):	LLM #2 (Gemini 3 Thinking)
Structure	Streamlined Experience/Projects section conserves space; logical contact→education→skills→experience flow; lacks dedicated professional summary.	Traditional separation of Experience/Projects plus Professional Summary creates stronger narrative; skill subcategories improve scannability.
Clarity	Concise bullets with	High-impact metrics (6M

	consistent action verbs and estimated quantification (~40%, 25%); professional tone; no first-person.	views, 7.4K subs) stand out; summary frames value upfront; slightly longer bullets may reduce quick-scan efficiency.
Formatting	ATS-optimized plain text; consistent bold headers and bullet styling; strict one-page adherence; clean visual hierarchy.	Enhanced visual grouping with skill subcategories; bold headers; risk of page overflow; slightly denser but visually organized.
Overall Quality	8.5/10: Tight, impactful, ATS-safe; quantified achievements; would benefit from opening summary for context.	9/10: Polished narrative with standout metrics and comprehensive skill taxonomy; verify one-page constraint in final render.

Gemini's resume felt more polished, mainly because it opened with a professional summary and used concrete numbers like "6 million views" instead of vague estimates. I also liked how it grouped skills into clear categories, which makes scanning easier.

My version focused on keeping things simple but it read a bit flat, and after checking common AI writing patterns online, I noticed my draft had some very common signs like repetitive sentence starters, formal phrasing, and not enough personality.

So I mixed things up and swapped generic phrases for more direct wording. For the final resume, I took the best parts from both outputs like Gemini's strong metrics and summary structure, and I kept Qwen's clean formatting. I believe I was able to balance impact with readability by doing this.

What this taught me about prompting was that being specific helps, but leaving a little room for the model to "fill in the gaps" is also a good thing because it can suggest things that you wouldn't think of yourself. Instead of just asking for a resume straight up, further specifying parts and requirements is a good idea to improve output quality from the get go.

Overall, I can say that the best results came from treating the AI as a collaborator, where you manually go through the output and change it accordingly to your tastes and preference.
